Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology)

Michel Cotsaftis

Productivity enhancement is a major concern for all manufacturing enterprises. Productivity enhancement can be achieved in many ways and many facets of its problems have been investigated over the last decades. A number of methods, tools and technologies have emerged to efficiently increase productivity and rationalize management of manufacturing enterprises. International experts from both academia and industry share their experiences in this collection of articles, contributing to the latest advances in the many facets of productivity enhancement in manufacturing enterprises. Themes and visions are detailed on factories of the future, new management approaches, manufacturing system integration and manufacturing information systems. These technical areas can be grouped into four major sections: Factories of the future; Techniques and tools for automated manufacturing; Robotics; and Industrial applications. The papers illustrate a pattern of valuable and interesting approaches to the fascinating problem of designing a new generation of robots with high enough performance capabilities to be used in an industrial context.

From reader reviews:

April Young:

Have you spare time for the day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the actual Mall. How about open as well as read a book entitled Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology)? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have additional opinion?

Benjamin White:

The actual book Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology) will bring you to definitely the new experience of reading the book. The author style to explain the idea is very unique. In the event you try to find new book to learn, this book very appropriate to you. The book Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology) is much recommended to you to see. You can also get the e-book in the official web site, so you can more readily to read the book.

Betty Freeman:

The guide with title Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology) possesses a lot of information that you can find out it. You can get a lot of advantage after read this book. That book exist new information the information that exist in this publication represented the condition of the world today. That is important to you to find out how the improvement of the world. This particular book will bring you inside new era of the global growth. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Ann Clark:

You can find this Advances in Factories of the Future, CIM and Robotics (Manufacturing Research and Technology) by go to the bookstore or Mall. Simply viewing or reviewing it can to be your solve difficulty if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by written or printed but also can you enjoy this book simply by e-book. In the modern era including now, you just looking from your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose suitable ways for you.
