Frances R. Frankenburg MD

Brain-Robbers: How Alcohol, Cocaine, Nicotine, and Opiates Have Changed Human History (Praeger Series on Contemporary Health and Living) Frances R. Frankenburg MD

A psychiatrist examines how the world's four most important mind-altering substances? alcohol, cocaine, nicotine, and opiates?have played a significant role throughout human history, and explains how these powerful drugs affect the brain and cause addiction.

- Presents a historical review of four plant-derived drugs?alcohol, cocaine, nicotine, and opiates?and their effects throughout human civilization, as well as a fascinating exploration of the mystery and misery of addiction
- Provides comprehensive explanations of medical and psychiatric effects of these drugs
- Supplies stories of people who made discoveries about these drugs or who had their lives altered by them
- Describes the discovery of the way in which the brain works
- Includes illustrations of brain pathways and of the four plants of origin for these drugs, and maps showing drug trade triangles
