**Autonomy Research for Civil Aviation: Toward a New Era of Flight** Committee on Autonomy Research for Civil Aviation, Aeronautics and Space Engineering Board, Division on Engineering and Physical Sciences, National Research Council

The development and application of increasingly autonomous (IA) systems for civil aviation is proceeding at an accelerating pace, driven by the expectation that such systems will return significant benefits in terms of safety, reliability, efficiency, affordability, and/or previously unattainable mission capabilities. IA systems range from current automatic systems such as autopilots and remotely piloted unmanned aircraft to more highly sophisticated systems that are needed to enable a fully autonomous aircraft that does not require a pilot or human air traffic controllers. These systems, characterized by their ability to perform more complex mission-related tasks with substantially less human intervention for more extended periods of time, sometimes at remote distances, are being envisioned for aircraft and for air traffic management and other ground-based elements of the national airspace system. Civil aviation is on the threshold of potentially revolutionary improvements in aviation capabilities and operations associated with IA systems. These systems, however, face substantial barriers to integration into the national airspace system without degrading its safety or efficiency.

*Autonomy Research for Civil Aviation* identifies key barriers and suggests major elements of a national research agenda to address those barriers and help realize the benefits that IA systems can make to crewed aircraft, unmanned aircraft systems, and ground-based elements of the national airspace system. This report develops a set of integrated and comprehensive technical goals and objectives of importance to the civil aeronautics community and the nation. *Autonomy Research for Civil Aviation* will be of interest to U.S. research organizations, industry, and academia who have a role in meeting these goals.

**From reader reviews:**

**Kimberly Pratt:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Autonomy Research for Civil Aviation: Toward a New Era of Flight. Try to make the book Autonomy Research for Civil Aviation: Toward a New Era of Flight as your pal. It means that it can to get your friend when you feel alone and beside that of course make you smarter than ever. Yeah, it is very fortunated in your case. The book makes you far more confidence because you can know anything by the book. So , let me make new experience as well as knowledge with this book.

**Chris Boos:**

In this 21st centuries, people become competitive in most way. By being competitive currently, people have do something to make all of them survives, being in the middle of the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yes, by reading a publication your ability to survive enhance then having chance to remain than other is high. To suit your needs who want to start reading the book, we give you that Autonomy Research for Civil Aviation: Toward a New Era of Flight book as basic and daily reading e-book. Why, because this book is greater than just a book.

**Heather Lanham:**

The particular book Autonomy Research for Civil Aviation: Toward a New Era of Flight will bring you to the new experience of reading a new book. The author style to elucidate the idea is very unique. In the event you try to find new book to learn, this book very acceptable to you. The book Autonomy Research for Civil Aviation: Toward a New Era of Flight is much recommended to you you just read. You can also get the e-book in the official web site, so you can quicker to read the book.

**Ruth Morefield:**

Reading a book tends to be new life style in this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Having book everyone in this world may share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story as well as their experience. Not only the storyplot that share in the books. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their proficiency in writing, they also doing some analysis before they write to the book. One of them is this Autonomy Research for Civil Aviation: Toward a New Era of Flight.
