Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials

Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials

Scarcity of resources and increasing population and energy demands are important issues of the twenty-first century. A multidisciplinary approach is needed to produce suitable alternatives—such as renewable resources—for a more sustainable future. One of the most promising and widely available renewable feedstocks is biomass, which has significant potential for conversion to materials, fuels, and chemicals. In addition, nanomaterials can be designed for a range of applications including energy storage, fuel production, and nanocatalysis. Designing nanomaterials for the valorization of biomass and waste feedstocks is a major step in advancing the application of nanomaterials and helping to move us toward the goal of a sustainable economy.

Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials offers a wide-ranging approach to the development of innovative nanomaterials for biomass conversion and the production of energy and high-added-value chemicals, including biochemicals, biomaterials, and biofuels. The book is organized into three parts according to nanomaterial applications: Nanomaterials for Energy Storage and Conversion, Biofuels from Biomass Valorization Using Nanomaterials, and Production of High-Added-Value Chemicals from Biomass Using Nanomaterials.

Providing a multidisciplinary perspective, this book covers the most important aspects of topics such as solar energy storage, design of carbonaceous nanomaterials as heterogeneous catalysts for producing biofuels, catalytic reforming of biogas into syngas using a range of nanoparticles, and biofuels production from waste oils and fats. It also describes the design and development of biocatalytic, solid acid, photocatalytic, and nanostructured materials for the conversion of various biomass feedstocks to valuable chemicals as intermediates to end products, such as biopolymers, bioplastics, biofuels, agrochemicals, and pharmaceutical products.

From reader reviews:

Robert Hay:

Book is usually written, printed, or created for everything. You can know everything you want by a guide. Book has a different type. As it is known to us that book is important issue to bring us around the world. Alongside that you can your reading ability was fluently. A e-book Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials will make you to be smarter. You can feel more confidence if you can know about everything. But some of you think in which open or reading any book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you looking for best book or appropriate book with you?

David Williams:

As people who live in the modest era should be revise about what going on or details even knowledge to make them keep up with the era that is certainly always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what kind you should start with. This Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Maria Carlin:

The knowledge that you get from Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials could be the more deep you excavating the information that hide within the words the more you get thinking about reading it. It doesn't mean that this book is hard to know but Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials giving you enjoyment feeling of reading. The writer conveys their point in certain way that can be understood by means of anyone who read this because the author of this e-book is well-known enough. This specific book also makes your vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials instantly.

Charles Branch:

As a pupil exactly feel bored to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Producing Fuels and Fine Chemicals from Biomass Using Nanomaterials can make you really feel more interested to read.
