Spaces of Aid Lisa Smirl

Aid workers commonly bemoan that the experience of working in the field sits uneasily with the goals they've signed up to: visiting project sites in air-conditioned Land Cruisers while the intended beneficiaries walk barefoot through the heat, or checking emails from within gated compounds while surrounding communities have no running water. *Spaces of Aid* provides the first book-length analysis of what has colloquially been referred to as Aid Land. It explores in depth two high-profile case studies, the Aceh tsunami and Hurricane Katrina, in order to uncover a fascinating history of the objects and spaces that have become an endemic yet unexamined part of the delivery of humanitarian assistance.
