Research-Based Practices for Teaching Common Core Literacy P. David Pearson, Elfrieda H. Hiebert

This one-of-a-kind resource will be invaluable to every teacher educator, every curriculum director, and every literacy coach, whether or not they must meet Common Core Standards. Bringing together perspectives from literacy luminaries, each addressing their specialty, this book offers an accessible fund of rich practices in literacy instruction. The book serves two purposes: First, it assembles a body of knowledge and wisdom from leading literacy researchers who each draw from a long career in the field to address topics of central importance to good literacy instruction. Second, these research-to-practice leaders connect established best practices and foundational research to the current challenge of instruction to meet Common Core Standards and other rigorous curriculum guidelines. The contributors point out strengths of the Common Core as well as issues and oversights that educators should be aware of. Closing chapters situate the Common Core within a continuum of educational policy and legislation.

“Pearson and Hiebert have long advocated for children in schools, and this volume is no exception. They and their chapter authors situate the CCSS within the historical and policy context in which it was written and support the literacy education community as we wrestle with the implications the standards have for research, for teachers, for teaching, and for learning.”

—**Sharon Walpole**, University of Delaware

“This book gets way beyond generalities and polemics about the Common Core, taking a deep and measured dive into a wide range of essential topics within the standards. I read a lot, and I can't think of the last time I read anything about the CCSS as engaging and thought provoking as this.”

—**Nell K. Duke**, University of Michigan
