These technical indicators are never used alone but applied in various combinations. Developed and tested over many years by the authors, the highly reliable strategies described in this book combine a variety of charting techniques, which, when used in conjunction, have been shown to yield extremely accurate predictions about a stock's movements through the four cyclical phases of Birth, Momentum, Exhaustion and Death.

- You get powerful strategies, using a range of technical indicators, guaranteed to significantly improve your ability to more accurately—and profitably—time buy, hold and sell decisions
- The material in this book is currently required reading for the authors' prestigious Compound Stock Earnings (CSE) charting course
- Includes a special link to the main CSE website where you'll find a treasure trove of additional content, updates, and instructional videos and podcasts
- Provides valuable insights and information about the Covered Call approach to trading, a style about which Joseph R. Hooper is an internationally recognized expert
