David Hulme

Global Poverty: Global governance and poor people in the Post-2015 Era (Global Institutions) David Hulme

Around 1.4 billion people presently live in extreme poverty, and yet despite this vast scale, the issue of global poverty had a relatively low international profile until the end of the 20th century. In this important new work, Hulme charts the rise of global poverty as a priority global issue, and its subsequent marginalisation as old themes edged it aside (trade policy and peace-making in regions of geo-political importance) and new issues were added (terrorism, global climate change and access to natural resources).

Key updates for the new edition:

- evaluation of the post-2015 Development Agenda and the Rio+20
- exploration of how Colombia and Brazil are pushing a sustainability agenda as a Southern perspective to challenge the aid focus of OECD post-MDGs interests
- examination and discussion of the gradual shift of power and influence to the BRICs and emerging regional powers (Indonesia, Turkey, South Africa) but the lack of change in global institutions
- exploration of Russia's lack of participation in the development agenda ?

The first book to tackle the issue of global poverty through the lens of global institutions; this fully updated volume provides an important resource for all students and scholars of international relations, development studies and international political economy.
