Large projects, especially in the construction and infrastructure sectors, involve collaborations of many different types, such as built-own-operate, public-private partnership or competitive dialogue. This monograph details the authors' research on the types of collaborative projects; how they vary in different parts of the world; what sort of knowledge, skills, attributes and experience are necessary to deliver these projects; and how any identified gaps can be bridged. Recommendations are made based on interviews with 36 subject matter experts from several countries, as well as an extensive literature review.
