Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications)

Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications)

Cyber Physical Systems: Architectures, Protocols and Applications helps you understand the basic principles and key supporting standards of CPS. It analyzes different CPS applications from the bottom up, extracting the common characters that form a vertical structure. It presents mobile sensing platforms and their applications toward interrelated paradigms, highlighting and briefly discussing different types of mobile sensing platforms and the functionalities they offer. It then looks at the naming, addressing, and profile services of CPS and proposes a middleware component to meet the requirements of dynamic applications and sensors/actuators deployment/configurations across different platforms.

The middle chapters of the book present a context-aware sensor search, selection, and ranking model which addresses the challenge of efficiently selecting a subset of relevant sensors out of a large set of sensors with similar functionality and capabilities. The authors consider various topics in the energy management of CPS and propose a novel energy-efficient framework. They also present the fundamental networking technologies of CPS and focus on machine-to-machine communications for CPS, specifically the open technologies such as IPv6-based solutions that can be integrated into IoT and enable wireless sensor communications.

In the book's final chapters, the authors bring you up to date on mobile cloud computing (MCC) research activities that enhance the capabilities of resource-constrained smart devices in CPS sensory environments. They also present a few representative CPS applications, including connected healthcare, gaming in public transport crowds, and a series of MCC-enabled emerging CPS applications. You will find that these application fields fully demonstrate the great potential of applying CPS in public life.

From reader reviews:

Christi Ross:

Within other case, little folks like to read book Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications). You can choose the best book if you want reading a book. So long as we know about how is important a new book Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications). You can add know-how and of course you can around the world by a book. Absolutely right, because from book you can understand everything! From your country until foreign or abroad you may be known. About simple matter until wonderful thing you may know that. In this era, we can open a book or searching by internet unit. It is called e-book. You can use it when you feel uninterested to go to the library. Let's examine.

Gary Gonzales:

In this 21st hundred years, people become competitive in every way. By being competitive today, people have do something to make all of them survives, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated it for a while is reading. Yep, by reading a e-book your ability to survive boost then having chance to stand up than other is high. For you personally who want to start reading a new book, we give you this kind of Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) book as beginner and daily reading reserve. Why, because this book is usually more than just a book.

Joshua Matthews:

In this era globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Often the book that recommended for your requirements is Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) this book consist a lot of the information in the condition of this world now. This particular book was represented so why is the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Typically the writer made some study when he makes this book. That's why this book suitable all of you.

Michael Medellin:

You may get this Cyber Physical Systems: Architectures, Protocols and Applications (Wireless Networks and Mobile Communications) by browse the bookstore or Mall. Simply viewing or reviewing it might to be your solve difficulty if you get difficulties for ones knowledge. Kinds of this book are various. Not only by means of written or printed but additionally can you enjoy this book simply by e-book. In the modern era such as now, you just looking of your mobile phone and searching what their problem. Right now, choose

your ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose correct ways for you.
