New Ideas in Low Dimensional Topology (Series on Knots and Everything) Kauffman Louis H Et Al

This book consists of a selection of articles devoted to new ideas and developments in low dimensional topology. Low dimensions refer to dimensions three and four for the topology of manifolds and their submanifolds. Thus we have papers related to both manifolds and to knotted submanifolds of dimension one in three (classical knot theory) and two in four (surfaces in four dimensional spaces). Some of the work involves virtual knot theory where the knots are abstractions of classical knots but can be represented by knots embedded in surfaces. This leads both to new interactions with classical topology and to new interactions with essential combinatorics.

From reader reviews:

Scott Croft:

What do you concerning book? It is not important with you? Or just adding material if you want something to explain what the ones you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have extra time? What did you do? Every person has many questions above. They should answer that question due to the fact just their can do that. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this New Ideas in Low Dimensional Topology (Series on Knots and Everything) to read.

Joel Kiser:

Reading can called mind hangout, why? Because while you are reading a book specially book entitled New Ideas in Low Dimensional Topology (Series on Knots and Everything) your brain will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely can be your mind friends. Imaging every word written in a e-book then become one contact form conclusion and explanation this maybe you never get previous to. The New Ideas in Low Dimensional Topology (Series on Knots and Everything) giving you a different experience more than blown away your head but also giving you useful facts for your better life in this particular era. So now let us demonstrate the relaxing pattern the following is your body and mind is going to be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary investing spare time activity?

Faye Michaels:

Are you kind of occupied person, only have 10 or even 15 minute in your moment to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book compared to can satisfy your small amount of time to read it because this all time you only find guide that need more time to be study. New Ideas in Low Dimensional Topology (Series on Knots and Everything) can be your answer since it can be read by you who have those short extra time problems.

Glen Hall:

A number of people said that they feel uninterested when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the actual book New Ideas in Low Dimensional Topology (Series on Knots and Everything) to make your current reading is interesting. Your current skill of reading expertise is developing when you just like reading. Try to choose straightforward book to make you enjoy to see it and mingle the idea about book and looking at especially. It is to be very first opinion for you to like to wide open a book and examine it. Beside that the guide New Ideas in Low Dimensional Topology (Series on Knots and Everything) can to be your new friend when you're really feel alone and confuse in what must you're doing of that time.
