New Trends in Green Chemistry

V.K. Ahluwalia, M. Kidwai

New Trends in Green Chemistry V.K. Ahluwalia, M. Kidwai

Organic chemistry has played a vital role in the development of diverse molecules which are used in medicines, agrochemicals and polymers. Most of the chemicals are produced on an industrial scale. The industrial houses adopt a synthesis for a particular molecule which should be cost-effective. No attention is paid to avoid the release of harmful chemicals in the atmosphere, land and sea. During the past decade special emphasis has been made towards green synthesis which circumvents the above problems. Prof. V. K. Ahluwalia and Dr. M. Kidwai have made a sincere effort in this direction. This book discusses the basic principles of green chemistry incorporating the use of green reagents, green catalysts, phase transfer catalysis, green synthesis using microwaves, ultrasound and biocatalysis in detail. Special emphasis is given to liquid phase reactions and organic synthesis in the solid phase. I must congratulate both the authors for their pioneering efforts to write this book. Careful selection of various topics in the book will serve the rightful purpose for the chemistry community and the industrial houses at all levels. PROF. JAVED IQBAL, PhD, FNA Distinguished Research Scientist & Head Discovery Research Dr. Reddy's Laboratories Ltd.

From reader reviews:

Mary Fleeman:

With other case, little men and women like to read book New Trends in Green Chemistry. You can choose the best book if you appreciate reading a book. Given that we know about how is important a book New Trends in Green Chemistry. You can add know-how and of course you can around the world by just a book. Absolutely right, because from book you can recognize everything! From your country until foreign or abroad you can be known. About simple thing until wonderful thing you are able to know that. In this era, we could open a book or perhaps searching by internet system. It is called e-book. You need to use it when you feel fed up to go to the library. Let's study.

Linda Manning:

Book is definitely written, printed, or created for everything. You can understand everything you want by a publication. Book has a different type. To be sure that book is important factor to bring us around the world. Alongside that you can your reading proficiency was fluently. A publication New Trends in Green Chemistry will make you to possibly be smarter. You can feel considerably more confidence if you can know about everything. But some of you think in which open or reading the book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you trying to find best book or suited book with you?

Becky Duncan:

Nowadays reading books be than want or need but also turn into a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want get more knowledge just go with education and learning books but if you want experience happy read one having theme for entertaining like comic or novel. The New Trends in Green Chemistry is kind of publication which is giving the reader erratic experience.

Leah Humphries:

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some e-book, they are complained. Just minor students that has reading's heart or real their passion. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this New Trends in Green Chemistry can make you truly feel more interested to read.
