Manufacturing Automation Yusuf Altintas

Metal cutting is widely used in producing manufactured products. The technology has advanced considerably along with new materials, computers and sensors. This new edition considers the scientific principles of metal cutting and their practical application to manufacturing problems. It begins with metal cutting mechanics, principles of vibration and experimental modal analysis applied to solving shop floor problems. There is in-depth coverage of chatter vibrations, a problem experienced daily by manufacturing engineers. Programming, design and automation of CNC (computer numerical control) machine tools, NC (numerical control) programming and CAD/CAM technology are discussed. The text also covers the selection of drive actuators, feedback sensors, modelling and control of feed drives, the design of real time trajectory generation and interpolation algorithms and CNC-oriented error analysis in detail. Each chapter includes examples drawn from industry, design projects and homework problems. This is ideal for advanced undergraduate and graduate students and also practising engineers.

From reader reviews:

Timothy Patrick:

The book Manufacturing Automation gives you the sense of being enjoy for your spare time. You should use to make your capable much more increase. Book can to become your best friend when you getting pressure or having big problem using your subject. If you can make reading through a book Manufacturing Automation to get your habit, you can get considerably more advantages, like add your personal capable, increase your knowledge about a few or all subjects. You could know everything if you like wide open and read a e-book Manufacturing Automation. Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this book?

Jane Nelsen:

Information is provisions for people to get better life, information currently can get by anyone at everywhere. The information can be a understanding or any news even restricted. What people must be consider whenever those information which is inside former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Manufacturing Automation as your daily resource information.

Charlotte Bernstein:

People live in this new morning of lifestyle always try to and must have the free time or they will get lots of stress from both day to day life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not just a robot. Then we inquire again, what kind of activity do you have when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you try this one, reading textbooks. It can be your alternative throughout spending your spare time, the book you have read will be Manufacturing Automation.

Rex Vogler:

What is your hobby? Have you heard that question when you got learners? We believe that that query was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person including reading or as examining become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is this Manufacturing Automation.
