Postharvest Technology and Food Process Engineering Amalendu Chakraverty, R. Paul Singh

Cereals, legumes, oilseeds, fruits, and vegetables are the most important food crops in the world, with cereal grains contributing the bulk of food calories and proteins worldwide. Generally, the supply of grains and other food can be enhanced by increasing production and by reducing postharvest losses. While food production has increased significantly over the last few decades, minimizing huge postharvest losses as well as utilizing their by-products/wastes is the optimal way for a country to become self-sufficient in food.

Postharvest Technology and Food Process Engineering combines these two subject areas as it covers both the primary processing of cereals, pulses, fruits, and vegetables and utilization of by-products/biomass.

This book covers postharvest food preservation and processing methods, with an emphasis on grains. It is divided into five parts:

- Grain-Properties, Drying and Dryers
- Grain Storage
- Parboiling and Milling
- By-Products/Biomass Utilization
- Food Process Engineering

The text covers grain structure and composition, psychrometry, the theory and methods of grain drying, and design, testing, specification and selection of grain dryers. It describes processes such as parboiling of grain, hydrothermal treatment of grain, and milling of rice and other grains and pulses. The text also addresses biomass utilization and conversion technologies for energy, chemicals, food, and feed. The final section on food process engineering examines postharvest management including cooling, and packaging, and discusses preservation and processing, factors that affect deterioration, and various industrial preservation methods of fruits and vegetables. It also provides an overview of food chemistry and covers food engineering operations, including fluid mechanics and heat transfer.

From reader reviews:

Sara Jones:

Within other case, little men and women like to read book Postharvest Technology and Food Process Engineering. You can choose the best book if you want reading a book. Providing we know about how is important a book Postharvest Technology and Food Process Engineering. You can add understanding and of course you can around the world by just a book. Absolutely right, mainly because from book you can know everything! From your country until foreign or abroad you will find yourself known. About simple thing until wonderful thing you could know that. In this era, we can open a book or perhaps searching by internet system. It is called e-book. You should use it when you feel weary to go to the library. Let's learn.

Paul Andrews:

In this 21st one hundred year, people become competitive in most way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yes, by reading a guide your ability to survive raise then having chance to stand up than other is high. To suit your needs who want to start reading a new book, we give you this specific Postharvest Technology and Food Process Engineering book as starter and daily reading book. Why, because this book is usually more than just a book.

Ernest Bryan:

Reading a book can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a book you will get new information due to the fact book is one of many ways to share the information as well as their idea. Second, reading through a book will make you actually more imaginative. When you reading through a book especially fictional works book the author will bring someone to imagine the story how the personas do it anything. Third, you can share your knowledge to other people. When you read this Postharvest Technology and Food Process Engineering, you may tells your family, friends as well as soon about yours e-book. Your knowledge can inspire average, make them reading a guide.

William McCown:

In this period globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Often the book that recommended to you is Postharvest Technology and Food Process Engineering this reserve consist a lot of the information from the condition of this world now. That book was represented so why is the world has

grown up. The terminology styles that writer make usage of to explain it is easy to understand. Often the writer made some exploration when he makes this book. That is why this book appropriate all of you.
