Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series) N. H. Bingham, John M. Fry

Regression is the branch of Statistics in which a dependent variable of interest is modelled as a linear combination of one or more predictor variables, together with a random error. The subject is inherently two- or higher- dimensional, thus an understanding of Statistics in one dimension is essential.

Regression: Linear Models in Statistics fills the gap between introductory statistical theory and more specialist sources of information. In doing so, it provides the reader with a number of worked examples, and exercises with full solutions.

The book begins with simple linear regression (one predictor variable), and analysis of variance (ANOVA), and then further explores the area through inclusion of topics such as multiple linear regression (several predictor variables) and analysis of covariance (ANCOVA). The book concludes with special topics such as non-parametric regression and mixed models, time series, spatial processes and design of experiments.

Aimed at 2nd and 3rd year undergraduates studying *Statistics, Regression: Linear Models in Statistics* requires a basic knowledge of (one-dimensional) Statistics, as well as Probability and standard Linear Algebra. Possible companions include John Haigh's Probability Models, and T. S. Blyth & E.F. Robertsons' Basic Linear Algebra and Further Linear Algebra.

From reader reviews:

Jimmy Hicks:

Throughout other case, little people like to read book Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series). You can choose the best book if you love reading a book. Providing we know about how is important some sort of book Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series). You can add expertise and of course you can around the world by the book. Absolutely right, due to the fact from book you can know everything! From your country till foreign or abroad you will end up known. About simple point until wonderful thing you may know that. In this era, we could open a book or maybe searching by internet product. It is called e-book. You can use it when you feel uninterested to go to the library. Let's learn.

Winford Patterson:

Now a day individuals who Living in the era where everything reachable by connect with the internet and the resources within it can be true or not involve people to be aware of each data they get. How a lot more to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Looking at a book can help folks out of this uncertainty Information specifically this Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series) book because book offers you rich details and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you know.

Randy Jones:

Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series) can be one of your beginning books that are good idea. Most of us recommend that straight away because this guide has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to place every word into enjoyment arrangement in writing Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series) yet doesn't forget the main position, giving the reader the hottest as well as based confirm resource information that maybe you can be among it. This great information can certainly drawn you into completely new stage of crucial thinking.

Katrice Fredericksen:

Guide is one of source of knowledge. We can add our expertise from it. Not only for students but in addition native or citizen want book to know the upgrade information of year to help year. As we know those ebooks have many advantages. Beside many of us add our knowledge, can bring us to around the world. Through the book Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series) we can acquire more advantage. Don't one to be creative people? For being creative person must prefer to read a book. Simply choose the best book that suited with your aim. Don't possibly be doubt to change your life at this book Regression: Linear Models in Statistics (Springer Undergraduate Mathematics Series). You can more

attractive than now.
