What is Sime~Gen? For those of you who are reading this book without previous experience of this expansive universe here is a brief introduction:

Sime~Gen is a series of novels written by Jacqueline Lichtenberg and Jean Lorrh. It is set in a future where humans have mutated into two subspecies. Simes, who go through a brief but dramatic change at puberty and Gens, whose change, while just as dramatic, is invisible to the naked eye.

The outward sign of the Simes' change is development of tentacles on their forearms, four strong and flexible "handling" tentacles and two smaller tentacles just for selyn transfer, called "laterals." Gens produce life energy called "selyn" which Simes require once a month to live. Unfortunately, the result in obtaining this energy is usually the death of the Gen.

This physical transformation happens just prior to puberty. There is no way of knowing, before that, if a person will be Sime or Gen.

At the chronological beginning of the published novels by Jacqueline, and Jean, a second mutation of Sime emerges. These "channels" are able to keep Simes from Killing Gens, thus saving mankind from self-annihilation. The stories that you find here, and the published books by Jacqueline Lichtenberg and Jean Lorrh, explore the role of these new Simes, and the Gens who live side by side with them as humankind struggles to become one again.

This volume was edited by Zoe Farris and Karen L. MacLeod
