Fast Data Processing with Spark - Third Edition Krishna Sankar

A Fast, practical and informative guide introducing you to Big data and Data Science with Apache Spark

About This Book

- This practical tutorial will help developers get started with Spark, and explore its main features and architecture
- This single comprehensive resource offers an easy introduction to the framework, developing your knowledge quickly and pain-free
- This book was published based on the latest version of Apache Spark, giving you the most up-to-date information

Who This Book Is For

This book is for developers with little to no knowledge of Spark, but with a background in Scala/Java programming. It's recommended that you have experience in dealing and working with big data and a strong interest in data science.

What You Will Learn

- Install and set up Spark on your cluster
- Prototype distributed applications with Spark's interactive shell
- Data wrangling using the new DataFrame APIs
- Learn different ways to interact with Spark's distributed representation of data (RDDs)
- Query Spark with a SQL-like query syntax
- See how Spark works with big data
- Implement machine learning systems with highly scalable algorithms
- Use R, the popular Statistical Language, to work with Spark

In Detail

Spark is an open source cluster computing system that is designed to process large datasets at high speed and with ease of development (one standard, rather than a combination of tools such as Hive, Pig, and MapReduce for Hadoop). Spark has some similarities to the Hadoop platform, but it provides the ability to load data in-memory and query repeatedly (using Spark SQL), making it much quicker than disk-based systems such as Hadoop.

This book begins with some common methods to set up Spark and deploy it on various platforms such as Mesos, YARN, and Chef. Moving forward, you will learn to use the Spark shell, load data, and perform some simple machine learning as well. You will find out how to build and run your own Spark application. We will show you how to manipulate your RDD and you'll get an understanding of various DataFrame

APIs. The book will also cover the most common machine learning algorithms using Spark MLlib. Finally, we cover programming Spark with the R language.

From reader reviews:

Rodney Bryant:

In this 21st centuries, people become competitive in most way. By being competitive now, people have do something to make them survives, being in the middle of the particular crowded place and notice simply by surrounding. One thing that often many people have underestimated the item for a while is reading. Yes, by reading a book your ability to survive raise then having chance to stand up than other is high. For you personally who want to start reading a new book, we give you that Fast Data Processing with Spark - Third Edition book as nice and daily reading publication. Why, because this book is more than just a book.

Marva Larson:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get great deal of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we ask again, what kind of activity have you got when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative inside spending your spare time, the particular book you have read is Fast Data Processing with Spark - Third Edition.

Julie Chambers:

Fast Data Processing with Spark - Third Edition can be one of your nice books that are good idea. We recommend that straight away because this publication has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The article author giving his/her effort to put every word into enjoyment arrangement in writing Fast Data Processing with Spark - Third Edition nevertheless doesn't forget the main position, giving the reader the hottest and based confirm resource information that maybe you can be among it. This great information can certainly drawn you into completely new stage of crucial considering.

Maria Holder:

A number of people said that they feel weary when they reading a book. They are directly felt the idea when they get a half portions of the book. You can choose typically the book Fast Data Processing with Spark - Third Edition to make your own personal reading is interesting. Your personal skill of reading skill is developing when you similar to reading. Try to choose basic book to make you enjoy to study it and mingle the impression about book and reading especially. It is to be initially opinion for you to like to open a book and examine it. Beside that the publication Fast Data Processing with Spark - Third Edition can to be your friend when you're experience alone and confuse with what must you're doing of this time.
