Laws and Models: Science, Engineering, and Technology

Carl W. Hall

Laws and Models: Science, Engineering, and Technology Carl W. Hall

The "laws" that govern our physical universe come in many guises-as principles, theorems, canons, equations, axioms, models, and so forth. They may be empirical, statistical, or theoretical, their names may reflect the person who first expressed them, the person who publicized them, or they might simply describe a phenomenon. However they may be named, the discovery and application of physical laws have formed the backbone of the sciences for 3,000 years.

They exist by thousands. Laws and Models: Science, Engineering, and Technology-the fruit of almost 40 years of collection and research-compiles more than 1,200 of the laws and models most frequently encountered and used by engineers and technologists. The result is a collection as fascinating as it is useful. Each entry consists of a statement of the law or model, its date of origin, a one-line biography of the people involved in its formulation, sources of information about the law, and cross-references.

Illustrated and highly readable, this book offers a unique presentation of the vast and rich collection of laws that rule our universe. Everyone with an interest in the inner workings of nature-from engineers to students, from teachers to journalists-will find Laws and Models to be not only a handy reference, but an engaging volume to read and browse.

From reader reviews:

Tim Travers:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a book. Beside you can solve your condition; you can add your knowledge by the book entitled Laws and Models: Science, Engineering, and Technology. Try to make book Laws and Models: Science, Engineering, and Technology as your close friend. It means that it can be your friend when you really feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortunate for you personally. The book makes you much more confidence because you can know almost everything by the book. So, let me make new experience as well as knowledge with this book.

Joan Green:

Your reading sixth sense will not betray a person, why because this Laws and Models: Science, Engineering, and Technology publication written by well-known writer who really knows well how to make book that may be understood by anyone who have read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your hunger then you still hesitation Laws and Models: Science, Engineering, and Technology as good book not just by the cover but also by content. This is one reserve that can break don't ascertain book by its protect, so do you still needing a different sixth sense to pick this particular!? Oh come on your reading through sixth sense already told you so why you have to listening to a different sixth sense.

Erick Graf:

That book can make you to feel relax. This specific book Laws and Models: Science, Engineering, and Technology was vibrant and of course has pictures on the website. As we know that book Laws and Models: Science, Engineering, and Technology has many kinds or category. Start from kids until adolescents. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and relax. Try to choose the best book in your case and try to like reading this.

Irving Tarkington:

A lot of book has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the very best book for you, science, witty, novel, or whatever simply by searching from it. It is known as of book Laws and Models: Science, Engineering, and Technology. You can contribute your knowledge by it. Without causing the printed book, it may add your knowledge and make you actually happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination for a other place.
