Thomism's influence upon the development of Catholicism is difficult to overestimate - but how secure is its grip on the challenges that face contemporary society? *Culture and the Thomist Tradition* examines the crisis of Thomism today as thrown into relief by Vatican II, the 21st ecumenical council of the Roman Catholic Church. Following the Church's declarations on culture in the document *Gaudium et spes* - the Pastoral Constitution on the Church in the Modern World - it was widely presumed that a mandate had been given for transposing ecclesiastical culture into the idioms of modernity. But, says Tracey Rowland, such an understanding is not only based on a facile reading of the Conciliar documents, but is flawed by Thomism's own failure to demonstrate a workable theology of culture that might guide the Church through such transpositions. Thomism, which fails to specify the precise role of culture in moral formation, is problematic in a multicultural age where Christians are exposed to a complex matrix of institutions and traditions both theistic and secular. If Thomism perceives cultural diversity as a space in which ethical doubt potentially thrives, its wider ambivalence to modernity also impedes its development. Must a genuinely progressive Thomism learn with the Church to accommodate modernity? In opposition to such a stance, and in support of those who have resisted the trend in post-Conciliar liturgy to mimic the modernistic forms of mass culture, *Culture and the Thomist Tradition* musters a synthesis of the theological critiques of modernity to be found in the works of Alasdair MacIntyre, scholars of the international 'Communio' project and the Radical Orthodoxy circle. This synthesis, intended as a postmodern Augustinian Thomism, provides an account of the role of culture, memory and narrative tradition in the formation of intellectual and moral character. Re-evaluating the outcome of the Vatican II, and forming the basis of a much-needed Thomist theology of culture, the book argues that the anti-beauty orientation of mass culture acts as a barrier to the theological virtue of hope, and ultimately fosters despair and atheism.
